

Introduction

The 7th Street Corridor Plan was developed by the City Solutions Center (CSC) at the University of Louisville in cooperation with Triple S Planning Commission. The purpose of the project was to develop a plan for the 7th Street corridor in Shelbyville, Kentucky, between downtown Shelbyville and Clear Creek Park. The project aimed to develop a community-based vision for the corridor to ensure that it is an attractive and functional connector between downtown and the park entrance. The primary focus was on land use, streetscape, and infrastructure, including traffic flow. The planning process involved a series of public meetings to assess the study area and develop a vision for the future of the corridor based on community input and feedback.
